Description

Primetake Birdscaring Cartridges are designed to be used in and around airports and airfields to help with control and bird movement, and assist towards their dispersal.

The 12G Screech Cartridge incorporates a screech projectile which emits a high-pitched screech sound during flight. It has been designed to have a high level of resistance to water ingress in rainy conditions during use.

Range Safety Template available on request.

Environmental conditions at the time of firing, such as wind speed and direction, should always be considered - firing advice available on request.
