

PRODUCT DATA SHEET

PT9105A

VERSION 3

OVERVIEW

Pyro Trg-Sims

Code: PT9105A

VADS 2

Methods of Use

The VADS Portable Controller has been specifically designed for use in the deployment of electrically initiated simulation pyrotechnics for operational or training use.

Description

The Controller has 4 separate controlled channels capable of firing in excess of 100 electrically initiated pyrotechnics on a full battery. It has been designed to be waterproof with the lid case and pressure valve closed, showerproof with the lid open. Incorrect handling may cause injury. Observe the safety distances marked on the product and the instructions marked on the VADS unit.

SPECIFICATION

The Controller offers the following:

- Tested to fire Electrically Initiated Devices at a maximum distance of 200m using standard Black and Tan firing Cable on a single charge.
- It is easily portable. It has an arming key that renders the Controller safe when not inserted.
- The Controller has built-in rechargeable Batteries, with a Battery Low Indicator which will operate as a "traffic light" system.
- The Controller has a separate 'Arming' and 'Firing' action for safety.
- The Controller has 'Positive' Sprung type Arming and Firing switches and LED's indicate which channel is armed.
- It has a built-in test facility showing complete connection.
