VERSION 2

OVERVIEW

Exercise Cartridges

Code: PT1545

Weight: 180g approx.

Cartridge, 40mm, Exercise

Description

The Exercise Cartridge is designed to be used in the safe training and practice of loading and unloading of weapons.

The cartridge is a single piece construction of anodised aluminium, brass coloured and has been designed for durability and longevity through careful material selection and quality manufacturing.

As there are no energetics the cartridge is suitable for training in a variety of weapon systems.
