OVERVIEW

Brass Ammunition

Code: PT1584F

Projectile Weight: 740 grains

12.7 x 99mm (0.50") Armour Piercing Incendiary

Description

The Primetake Omega Sniper Ammunition has been designed as a highly accurate long range round, intended for use in high quality rifle/scope combinations of bolt action and semi-automatic rifles. For use where accuracy is a primary requirement.

Primetake's Omega Sniper range is manufactured with the highest quality components to the tightest tolerances achievable. Each production lot undergoes meticulous load development to guarantee optimised accuracy, velocity and minimal velocity spread thus resulting in a range of sniper ammunition that enjoys unrivaled hit probability at extreme ranges. Performance is dependent on the quality and specification of the selected firearm and atmospheric conditions.

This cartridge has a hardened steel penetrator, titanium ring and brass sabot. The penetrator is designed to punch through armoured targets at range with the titanium band producing a significant incendiary effect to the front and rear of the target.

Range Safety Template available on request.
