Description

Housed in an aluminum body incorporating a ringpull, fly-off lever mechanism, the heritage design format employed across Primetake's grenade series is immediately and widely recognised and trusted.

On deployment, function is immediately confirmed with mitigated smoke signature progressing to full output flow within 5 seconds, following which constant delivery and colour saturation is maintained for more than one minute.

Product formulation incorporates a calibrated reduction in smoke toxicity delivered with minimal/zero flame for safe and controlled operation and training. Product dimension compatible with vehicle stowage.
