PSi PRO LIQUID STREAM

REALLY NON-LETHAL INCAPACITATING SPRAY FOR MULTISITE USE

PROCEDURES:

1. Applications of **PSi Pro Liquid Stream** incapacitating spray for multisite use by police officers.

CRITICAL ACTIVITIES:

1. Identify the situation where it will be necessary to use the disabling spray:

- Actions of self-defense, of third parties and preservation of order;
- Control of crowds and riots.

2. Mastering the aggressor:

- Use immobilization techniques;
- Use techniques of handcuffs.

SEQUENCE OF ACTIONS:

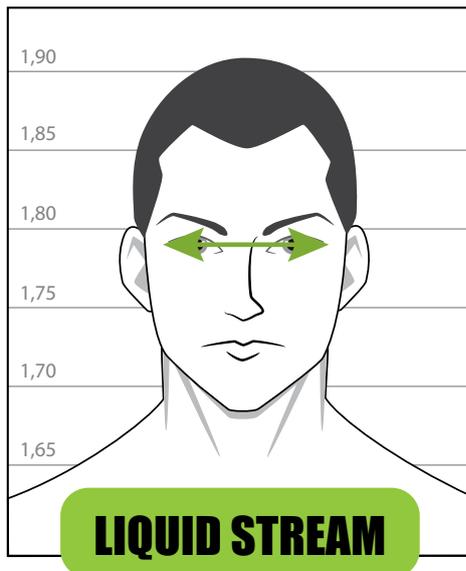

1. After the exhaustion of the verbal negotiations and before the use of physical force, use of baton/tonfa and use of firearm, are characterized the situations in which it is necessary the use the **PSi Pro incapacitating spray**;

2. It can be used both in open spaces and in confined spaces, due to its liquid form (and not in fog/mist) it does not affect the environment and neither third parties (bystanders and other police officers);

3. Keep a safe distance of the aggressor or resistant criminal, at least 3m (3.3yd). The jet stream reaches from 4 to 7 meters, according to the wind;

4. Remove the canister from the holster fastened to the belt;

5. Aim the canister to the face of the aggressor or resistant criminal, and with your thumb raise the flip-top safety shield and push down the red button, releasing the stream aiming at reaching the eyes of the targeted individual;

6. Give spray shots from 0.5 to 2 seconds about, or more, according the situation, or if the targeted individual is wearing glasses (if the aggressor is wearing glasses, find the spaces between the glasses and the face to reach the eyes);

7. Keep out of reach of the aggressor;

8. Master the aggressor using handcuffs (Handcuffing him with his arms to his back);

9. After the attacker's domain (handcuffed suspect), with the aggressive action demobilized by strong eye's burning, decontaminate him with running clean water until he can open his eyes.

ERROR POSSIBILITIES:

- The police officer does not exhaust verbal negotiations;
- The police officer uses **PSi Pro**, after using physical or lethal force;
- The police officer does not have the **PSi Pro incapacitating spray** at their disposal;
- The police officer evaluates mistakenly the situation in which **PSi Pro incapacitating spray** should be used;
- The police officer be mastered before he can remove the spray from its holster;
- The police officer does not know how to trigger the spray;
- The police officer triggers the spray at a very long distance, thus failing to hit the eyes of the aggressor;
- The police officer stays in a situation that allows the attacker physically hits him or even master him due to be very close, for example.;
- The police officer uses unnecessary physical force after having mastered the aggressor, incurring in criminal or administrative wrongdoing;
- The police officer does not decontaminate the aggressor, after using the **PSi Pro**, leaving him at the scene and going away;
- The police officer fails to provide medical care in cases of adverse reactions in the targeted individual;
- The police officer had no instruction or practical training with PSi Pro**, as well experiencing at himself the physiological symptoms that **PSi Pro** causes in humans.

EXPECTED RESULTS:

- To stop the aggressive action by a strong and intense eye's burning, reducing to the maximum the possibility of damages to the police officer, to the aggressor or to third parties;
- All use of the **PSi Pro incapacitating spray** must be formally reported, mentioning the need for its use in an appropriate document.

CORRECTIVE ACTIONS:

- Seek guidance for the use of equipment in case of any doubt;
- Always be aware of the effects and physiological symptoms caused by the **PSi Pro**, how to execute the decontamination of the aggressor, know well the techniques of incapacitating sprays use, and the techniques to mastery an aggressor;
- Know about the legal consequences of misuse or abusive use of the **PSi Pro**;
- Be aware that even if the targeted individual remains in prolonged contact with the **PSi Pro** (in eyes, on skin or even in case of ingestion of the product), the aggressor will have no **INJURIES**, because its composition is non-toxic vegetal extracts and with food grade. (proven by laboratory reports)

CLARIFICATIONS:

- PSi Pro incapacitating spray** should be used exclusively to ensure the physical integrity of police officers and spectators in case of imminent or consummate aggression, allowing the suspect to be arrested without the use of devices that may cause injuries to the aggressor;
- PSi Pro** must be considered and treated as a weapon of temporary incapacitating with prolonged effect, therefore, the police officer must maintain the zeal and control of its use, being responsible for the guarding of this equipment;
- The police officer assumes all responsibility for any misuse. Never use to coerce or intimidate innocent people, to avoid administrative and criminal penalties, if applicable.;
- The technical specifications of the equipment, its correct way of use, and other manufacturer's instructions are on the packaging and product labels.
